

LO: To use addition and subtraction to solve problems.

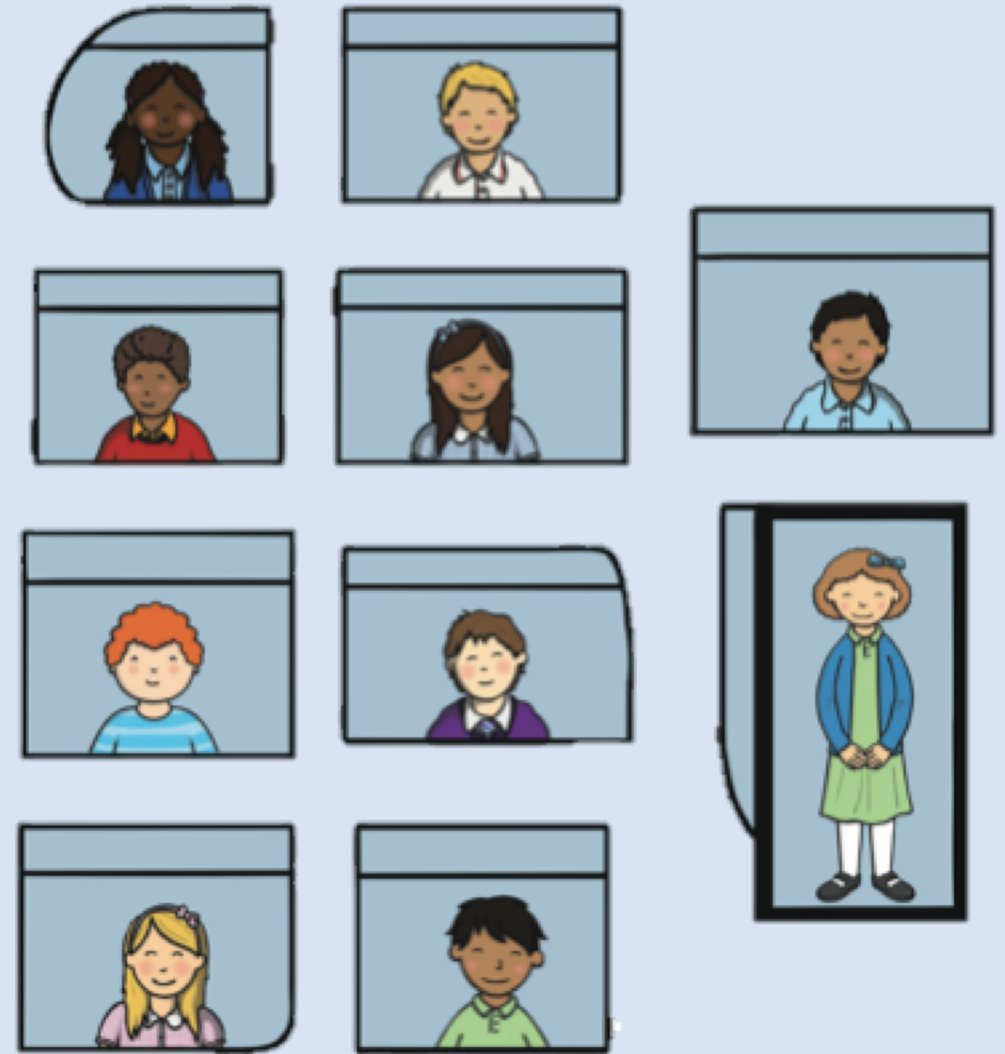

Let's switch your brains on...

You have 10 seconds go and find 7 items and bring them back

Times

Up!

Today you will need:

Let's do the first one together.

3 people get on  
to the bus.

$$0 + 3 = 3$$

1 person gets  
off the bus.

$$3 - 1 = 2$$

Let's try another one:

6 people get on  
to the bus.

$$0 + 6 = 6$$

4 people got off  
the bus.

$$6 - 4 = 2$$

Let's try another one:

10 people were  
on the bus.

6 people got  
off the bus at  
the next stop.

$$10 - 6 = 4$$

Let's try another one:

3 people get on  
to the bus.

Then another 3  
people get on  
to the bus.

Then 1 person  
got off the bus.

$$3 + 3 = 6$$

$$6 - 1 = 5$$

Let's try another one:

There are 7 people on the bus.

How many more people can fit on the bus?

Fill in the missing number sums.

$$7 + 1 =$$

$$7 + 2 =$$

$$7 + 3 =$$

Task:

Have a go at playing around with your bus and discover how many number sums you can make.

Maybe in the evening you can play the bus game with your family as well.

If you are feeling confident there is a bus that can hold 20 people.
