

Homework (due in Friday 8th March)

Your homework for the next few weeks is to create a project for British Science Week, the theme for which is **'Time'**. The brief is:

Consider a particular area of Science. How has our understanding in this area changed over time?

You could consider how our knowledge has changed in the area of medicine, space, building, evolution or even time itself! Remember the 'truth' is only the truth until scientists learn more or prove it wrong! What did we used to think that we don't think now? How has our knowledge changed over time?

You may present your project however you choose. It could be a game, a poster, a book, a video, a powerpoint. Be creative – there are no rules!

The projects will be collated into a gallery for parents and other pupils to enjoy during British Science Week.
