LO: To identify and represent numbers using different representations.

P	I can	CT
	I can read and write numbers up to 100/1000.	
	I can use dienes and PPW model to identify a number.	
	I can use dienes and PPW model to represent a number.	
	I can partition a number in more than one way.	

Can you find **two different ways** to partition the numbers at the top of the part-whole model? You can use dienes to try to help you. For the last two questions, try to partition your numbers even further.
