

Science

LO: To learn about germination in relation to bulbs and seeds.

In our science lesson this week we are looking at seeds, bulbs and the process of germination. We will be discussing germination and how bulbs and seeds grow into mature plants.

Work through the PowerPoint, and then your task is to create a poster discussing germination and discuss the process of seeds and bulbs growing into mature plants.

RE

LO: To learn about the Muslim holy book and how it was created.

This week we are looking at the Quran. Work through the PowerPoint to more about the Muslim holy book and how it was created. Then, choose the worksheet that suits your understanding and complete the statements.

EXT: Create a similarities and difference chart to compare The Quran and The Bible.

PE

Complete a Joe Wicks 30 minute workout.

DT

LO: To organise my information in a PowerPoint.

In this session, your team at school will be organising all of the information that they have collected about their invention. If you have access to a laptop, could you create some slides on PowerPoint including any information that you think is important for your invention e.g. how much you will sell it for, who you want to buy it.

Email your slides to your teacher so they can add them to your group PowerPoint.

Bonus

Watch Newsbites on Espresso and complete the weekly quiz.
