LO: To name the parts of flowering plants and explain their functions

In today's lesson we will be looking at the functions of the different parts of plants.

Work through the PowerPoint and then complete the sheet. You will need to label the parts, similar to what we did in the lesson where we dissected. Then after you have labelled each part, you need to write what the function of this part is.

PSHE

LO: To recognise ways in which stamina, strength and flexibility can be improved through daily physical activity.

Have a look at the PowerPoint.

Think about all the different examples of physical activity. Using the worksheet, you need to put the different forms of physical activity under the correct heading.

Is the physical activity developing strength, stamina, or flexibility? Could they be developing more than one? After you have thought of at least three different forms of physical activity, you need to think about how you are going to improve your own stamina, strength, and flexibility. Write a sentence on how you are going to develop your strength, stamina, and flexibility.

RE

LO: To understand the key Muslim festivals.

In this lesson, we are looking at the 5 main festivals in Islam: Ramadan, Eid-ul-Fitr, Eid-ul-Adha, Dhu Al-Hijja and Al Hijra.

Work through the PowerPoint to learn about these festivals and what happens at each one. Can you create an interview script for a documentary. The main point should be to find out important information about these festivals. Use the example script to help you.

DT

LO: To organise my information in a PowerPoint.

In this session, your team at school will be organising all of the information that they have collected about their invention. If you have access to a laptop, could you create some slides on PowerPoint including any information that you think is important for your invention e.g. how much you will sell it for, who you want to buy it.

Email your slides to your teacher so they can add them to your group PowerPoint.
