Properties of Rocks

I can make systematic and careful observations.

Do each activity in turn and add your notes or record your observations on the following table.

| Name of Rock | Permeable | Durable | Density | Hard or Soft | |
|--------------|--------------------------------------|---------------------|--|--------------|--|
| | Does it allow water to pass through? | Is it hard wearing? | Is it high density (sinks) or low density (floats)? | _ | |
