

What can you see? Do you like this artwork?

L.O: To mix primary colours with accuracy.

Must: Identify primary colours.

Should: Mix primary colours accurately to create secondary colours.

Could: Identify what could be done differently.

The Purple Poppy

A two-minute silence is always held at 11 a.m. to remember the millions who have died in wars.

Remembrance Day is held on the 11th of November

- the 11th day of the 11th month of the year.

The Purple Poppy

Poppies are
worn on
Remembrance
Day.

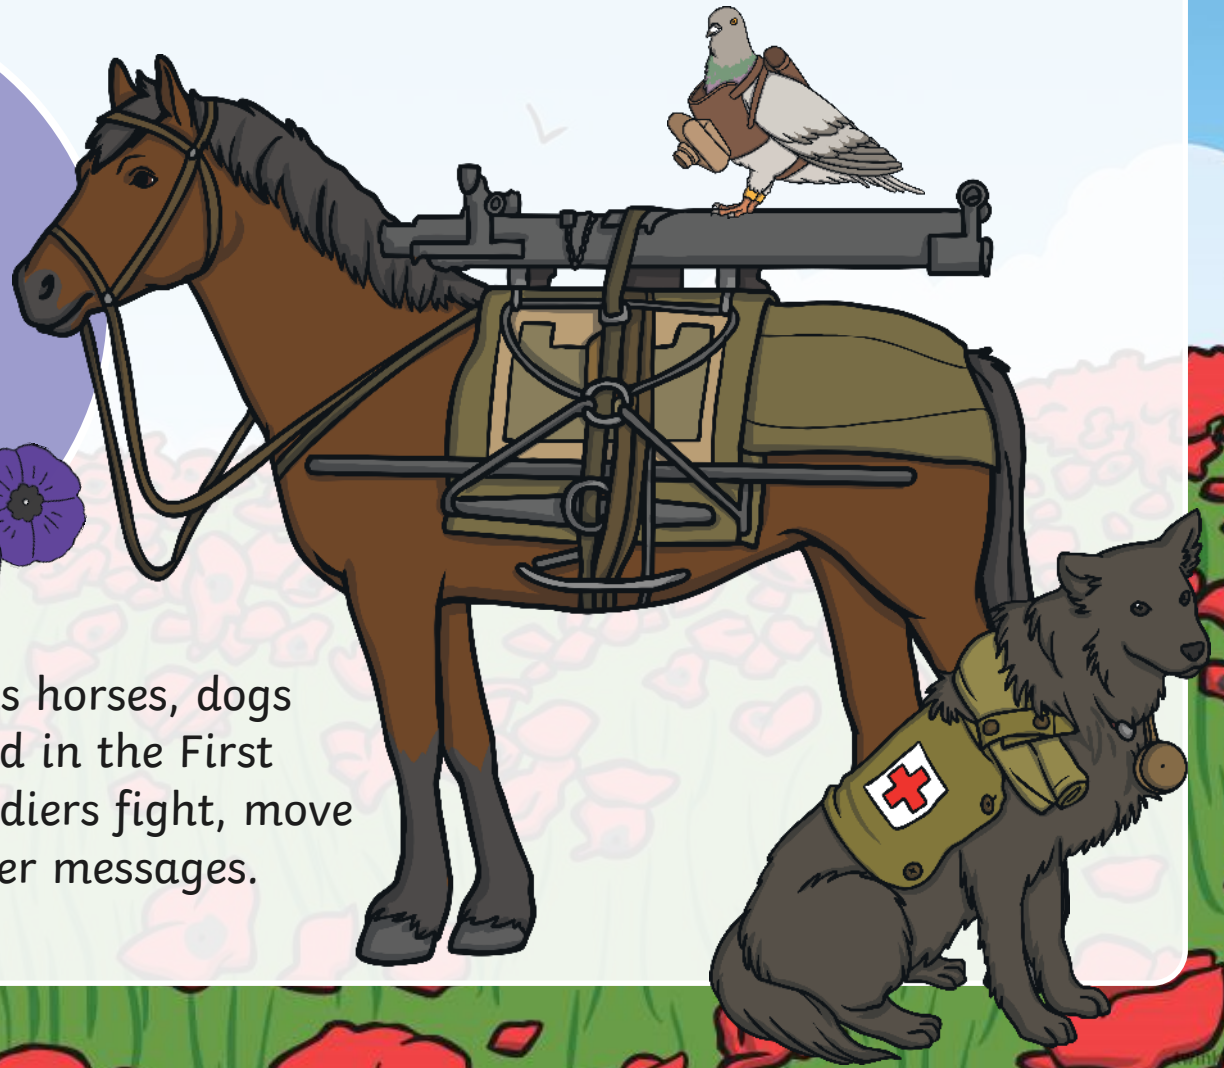

This is because they are the
flowers that grew on the
battlefields after the First World
War ended.

The Purple Poppy

Purple poppies are also worn to remember animals who have died in wars.

Many animals, such as horses, dogs and pigeons, were used in the First World War to help soldiers fight, move heavy items and deliver messages.

Jenna Fox made a meadow of giant wooden purple poppies positioned at the feet of the giant bronze war horse memorial.

Paul Cummins, blood swept lands and seas of red.

What do you think
the poppies are
made from?

Today using plastic bottles we will be making our own purple poppies. Have a look at the different shapes created using the bottles.

How can we make purple?

Using our knowledge of primary and secondary colours how can we make purple?

Task:

Using the palettes mix the primary colours to create purple. Make swatches in your art book and write a comment whether you like it or want to change it.

Then when you are happy with your purple paint your poppy.
