

# **SATURN CLASS NEWSLETTER**

## **FRIDAY 3<sup>RD</sup> JULY 2015**

### **Literacy & Topic:**

Children are busy working on their Horrible History playscripts. This is based on the British Empire – children are using their research skills and working in groups. This is intended to bring our topic come alive and celebrate all the hard work already completed.

### **Maths:**

We are currently working on fractions and percentages. It is important for all children to comprehend how these are formed and how we can represent these types of number. We have spent some time looking at images to show our understanding and completed some outdoor learning of percentages of images on the playground.

### **Science:**

Our final unit of work this term is based on human diet and lifestyle. We have analysed our food intake on a typical week and we have looked at balanced diets – focusing on healthy and unhealthy foods. We will develop this by looking at the impact on food on our bodies and how we can remain healthy throughout our lives.

### **Sport:**

We were very fortunate to be able to lead a Sports Science event in school, where Saturn class were in charge of different exercise skills/activities. We collated information which will be used within ICT sessions – based on spreadsheets (Excel).

### **General:**

Yr6 children attending Longsands have completed their transition days. They will be completing transition work (prep for Y7 next week).

Saturn children who have not already completed Bikeability will start on Monday 13<sup>th</sup> July.
