

Count Vertices on 3D Shapes

1a. Circle and count the vertices on this shape.

7

6

8

4

VF

2a. Which shape has more than 5 vertices?

VF

3a. Match the shape to the number of vertices.

8

6

8

VF

4a. Circle the shape that has the same number of faces as vertices.

VF

Count Vertices on 2D Shapes

1b. Complete the table.

Shape	Number of Sides	Number of Vertices	Name of Shape
A.	6		
B.			

rectangle triangle hexagon

VF

2b. Tick the odd one out.

A.

B.

C.

VF

3b. Match the shapes to the correct number of vertices.

A.

B.

C.

6

4

5

VF

4b. Name the shape.

I have 1 more vertex than a pentagon.

rectangle

hexagon

octagon
