

21/10/20

LO: To use a part-whole model to add two numbers together.

P		CT
	Must: Identify the parts and whole.	
	Should: Add two parts to make the whole number.	
	Could: Solve mathematical problems using reasoning.	

If 2 is a part and 3 is a part,
what is the whole?

$$\boxed{2} + \boxed{3} = \boxed{}$$

___ is a part.

___ is a part.

___ is the whole.

If 5 is a part and 4 is a part,
what is the whole?

$$\boxed{5} + \boxed{4} = \boxed{}$$

___ is a part.

___ is a part.

___ is the whole.

If 6 is a part and 2 is a part,
what is the whole?

$$\boxed{6} + \boxed{2} = \boxed{}$$

___ is a part.

___ is a part.

___ is the whole.

If 7 is a part and 3 is a part,
what is the whole?

$$\boxed{7} + \boxed{3} = \boxed{}$$

___ is a part.

___ is a part.

___ is the whole.
