LO: to make inferences from a text.

Can you be a reading detective to look for clues in the text? Can the clues help you to answer the questions?

British Wildlife

There are lots of wild animals that live in Britain. There are many birds, mammals and even reptiles, such as snakes.

You can see some of these animals in your garden or local park. Some of them are nocturnal. This means they usually come out at night.

Nocturnal Animals

Hedgehogs, badgers and foxes usually come out at night.

Hedgehogs are very noisy eaters! They mostly eat beetles, caterpillars and worms but they also like cat food.

Badgers eat worms, frogs and rats but they will eat hedgehogs as well.

Owls often fly at night. One of the most common kinds is the barn owl. It has a white body and a golden back. Some people call it the screech owl because it can be very noisy. It eats mice, birds and insects.

Did You Know...?

- There are three types of snake that can be found in Britain.
- They are mostly harmless.
- The adder is the only venomous snake found in Britain but it is very shy and is not usually aggressive.

4. Look at the **Did You Know...?** section. Find and copy one word which shows that the adder will not usually come out to hurt people.

shy

Your task:

Year 1:

Read 'The Zoo Vet' text and answer the questions.

Choose the level of difficulty you feel most confident with. 1 star is the easiest and 3 stars is the hardest.

Extension: choose your favourite story and write a book review. What happens in the story? Who are the characters? What did you like/ not like?

Reception:

Main activity: watch the video of Miss Bleakley reading Traction Man. Draw a picture of your favourite part of the story. Can you write a sentence to explain why it is your favourite part?

Something harder: Can you answer some questions about the Traction Man story.
