

Homework for this half term (due in Tuesday 22nd March 2022)

Your homework for this half term is to research a famous scientist. You can present your research however you like – could be a written fact-file, a fancy double page spread, a powerpoint, a video or even a poster. Then you should challenge

yourself to extend your learning, perhaps by completing an experiment similar to those which your scientist carried out: maybe making a model or drawing what they contributed to the world of science. It is International Day of Girls and Women in Science on 11th February this year so it would be lovely to see some female scientists represented too please.

There are very few rules; please make this your own piece of work. Those children in Key Stage 2 should aim to spend about 4 hours during the month on this work. For the younger children, this is optional and time spent should be at parents' discretion.

Most importantly, have fun and be ready to share your learning with your class at the end of term.

Mrs Whiting
