

Varied Fluency
Add Two 4-Digit Numbers 2

Developing

1a. **B: 5,550**

2a. **6**

3a. **7,473**

4a. **Inserting numbers from 3 to 9 will lead to an exchange. If 5 is used, the answer is 4,842.**

Expected

5a. **C: 3,108**

6a. **9**

7a. **7,863**

8a. **Inserting numbers from 7 to 9 will lead to an exchange. If 7 is used, the answer is 7,908.**

Greater Depth

9a. **A: 8,186**

10a. **5**

11a. **9,794**

12a. **For both calculations to need an exchange, the numbers 5 to 9 must be inserted. If 5 is used, A totals 3,809 and B totals 6,469.**

Varied Fluency
Add Two 4-Digit Numbers 2

Developing

1b. **C: 3,684**

2b. **6**

3b. **6,480**

4b. **Inserting numbers from 7 to 9 will lead to an exchange. If 8 is used, the answer is 7,661.**

Expected

5b. **B: 9,377**

6b. **9**

7b. **8,683**

8b. **Inserting numbers from 6 to 9 will lead to an exchange. If 6 is used, the answer is 9,069.**

Greater Depth

9b. **B: 8,979**

10b. **8**

11b. **8,639**

12b. **For both calculations to need an exchange, the number 9 must be inserted. If 9 is used, A totals 6,819 and B totals 9,808.**
