

Varied Fluency
Add Two 4-Digit Numbers 2

Developing

1a. B: 5,550

2a. 6

3a. 7,473

4a. Inserting numbers from 3 to 9 will lead to an exchange. If 5 is used, the answer is 4,842.

Expected

5a. C: 3,108

6a. 9

7a. 7,863

8a. Inserting numbers from 7 to 9 will lead to an exchange. If 7 is used, the answer is 7,908.

Greater Depth

9a. A: 8,186

10a. 5

11a. 9,794

12a. For both calculations to need an exchange, the numbers 5 to 9 must be inserted. If 5 is used, A totals 3,809 and B totals 6,469.

Varied Fluency
Add Two 4-Digit Numbers 2

Developing

1b. C: 3,684

2b. 6

3b. 6,480

4b. Inserting numbers from 7 to 9 will lead to an exchange. If 8 is used, the answer is 7,661.

Expected

5b. B: 9,377

6b. 9

7b. 8,683

8b. Inserting numbers from 6 to 9 will lead to an exchange. If 6 is used, the answer is 9,069.

Greater Depth

9b. B: 8,979

10b. 8

11b. 8,639

12b. For both calculations to need an exchange, the number 9 must be inserted. If 9 is used, A totals 6,819 and B totals 9,808.
