

Varied Fluency

Step 6: Subtract Two 4-Digit Numbers 2

National Curriculum Objectives:

Mathematics Year 4: (4C2) [Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate](#)

Differentiation:

Developing Questions to support subtracting two 4-digit numbers with up to one exchange. Pictorial support for all questions, including place value grids. No use of zero as a place holder.

Expected Questions to support subtracting two 4-digit numbers with one exchange. Calculations presented in column format or using place value grids. Some use of zero as a place holder.

Greater Depth Questions to support subtracting two 4-digit numbers with one exchange. Calculations presented in a variety of formats including, column, linear, bar model and part whole model. Use of zero as a place holder.
