

Year 5 Maths Week Commencing 11th October 2021

Monday 11.10.2021	Tuesday 12.10.2021	Wednesday 13.10.2021	Thursday 14.10.2021	Friday 15.10.2021
LO: To estimate answers by rounding and check answers using inverse operations	LO: To estimate answers by rounding and check answers using inverse operations	LO: To solve addition and subtraction multi-step problems	Maths Whizz 60 minutes  Maths-Whizz® Brought to you by Whizz Education	LO: To complete discussion based problems (for addition and subtraction)
What is rounding? When should we round numbers? How does this help us work out calculations? <i>If not certain look back to planning and work from week commencing 13th September.</i> Look at the examples from the worksheet for teacher support	Use Classroom Secrets PPT as teaching resource PPT covers fluency, reasoning and problem solving style questions.	What is a multi-step problem? How should these be tackled? Look at example question from worksheet. Think about what is the key information, what operation should I be using and how should I work out the problem.		If it is possible, work with someone from your household to complete task. If this is not possible, write down your thought process to complete the tasks. Think about skills learnt previously and how they can be incorporated into learning for today. <i>Can you attempt the extension task?</i>
<u>Activity/Resources:</u> Select your appropriate level from the 3 way differentiated worksheet	<u>Activity/Resources:</u> Complete both fluency and RPS sheets 3 level differentiation	<u>Activity/Resources:</u> Select your appropriate level from the 3 way differentiated worksheet		<u>Activity/Resources:</u> Complete discussion problems

Please use Tapestry to upload completed work. If you do not use Tapestry, please email to school office.
