

Great Staughton and Kimbolton Primary Academy
Year 6 Home Learning for Two Weeks Commencing 18th May 2020
Frequently Asked Questions

I am not overly happy with my child accessing YouTube without me supervising content. What should I do?

The clips that are accessible on YouTube have previously been watched and are appropriate for children. As the content is based on natural disasters, you may wish to preview the material first. If you would prefer, the videos can be saved on the school website, so children can access it from there. You will need to contact Mr Nelson for this to happen, as videos will need to be downloaded and then uploaded onto our website.

Can I complete science this week without using the online resources?

If you have circuitry resources than great! Use them. Remember, children may need to be supervised to complete this work if using practical resources.

The science hyperlinks do not load on my machine. What do I do?

Check your flash settings. Some links may not work on Chrome. Adjust settings or load using Internet Explorer and all resources should work. *I can access all of them on my work laptop.*

Year 6 Home Learning for Optional Extra Work 25th May 2020
Frequently Asked Questions

Why is the computing task the same as the previous week?

There is plenty of content in the stated block of work to last for two weeks. If you wish to progress that is fine. If knowledge isn't secure, take a look at previous years based activities. Work at a pace and level that is suitable for your child.

What can I do if my child can't access the resources for RE?

The website provided has most of the material needed to complete this task on one site. If you prefer to use different or additional material, that's fine. Teacher resources section is referred to. This provides questions or discussions for children to have. If you have used a different site, you may need to consider your own questions or discussion points to extend your learning.
