

Homework 29th January 2026

# Electrical safety

Your homework task is to create an informative leaflet or poster about electrical safety in the home.

Follow the link below and visit the 'Switched On Kids' website to learn about **electrical safety in the home**.

The banner for 'Switched On Kids' features the title 'Switched On Kids' with a lightbulb icon above it, and the subtitle 'electricity and how to use it safely'. Below the title are four navigation buttons: 'what is electricity?' with a lightbulb icon, 'electrical safety in your home' with a house icon, 'information for teachers and parents' with an 'i' icon, and 'fun and learning' with a globe icon. A yellow callout box says 'Explore The Sockets. Overload Calculators and more!'. On the right is a QR code. At the bottom, there are illustrations of a girl, a boy, and a dog. The website URL [switchedonkids.org.uk/](http://switchedonkids.org.uk/) is at the bottom.

## Find out about:

- Safe charging habits
- Hazards around the home
- Overloading sockets

## Present your findings

Make an informative poster or leaflet to show what you have learnt. We will be sharing this work in our science lessons as well as putting the posters up around school to help inform others about electrical safety.

**Homework Due: Tuesday 10th February**
